

JIC open Forum

23 February 2021

Agenda

Transcending national boundaries and organizations, the Joint Initiative Council's standards development organizations work collaboratively to provide global, coordinated—not competitive—standards that address real-world healthcare issues. In its recently released white paper, the JIC explores the desired future of a digital health ecosystem where high-quality data is available to the right people, at the right place and at the right time for high-quality decisions and care.
